# CARPOOL PARKING LOT INVENTORY - NOVEMBER 1989

## INTRODUCTION

The annual inventory of carpool parking activity was conducted in November. The inventory surveyed parking areas for the following: signs, facilities and vehicle counts.

## RESULTS

TOTAL NUMBER OF OFFICIAL MINISTRY PARKING LOTS: 50

TOTAL NUMBER OF PARKING SPACES: 3310

TOTAL NUMBER OF VEHICLES PARKED: 1780

AVERAGE OVERALL OCCUPANCY: 54%

Since the introduction of the first six carpool lots in 1979, the number and usage has been growing steadily during the past decade. Figure 1 details the growth of the lots over the past several years.

In the year since the last inventory, the Ministry has opened three new carpool parking lots and expanded two others, which altogether increased the number of spaces by 13.6%. Improvements were also made to several other lots. Although the number of vehicles using the lots increased by 6.0%, overall lot occupancy dropped to 54% mainly due to the large number of additional spaces becoming available this year. The use of the lots by the public has been fairly constant, which, as shown in Figure 2, usually ranges between 55 and 60%. Eight lots were at or near full capacity at the time of the survey.

As part of the inventory, many other sites were checked for carpool parking activity. Sixteen sites with carpool activity are identified in the inventory. A total of 154 vehicles were parked at these sites.

One carpool lot established by the municipality of Sutton was surveyed.

**BENEFITS**

The 1780 vehicles parked in official Ministry parking lots:

*SAVE ENERGY - 5,165,000 L of gasoline annually.

*REDUCE CONGESTION - reduced annual vehicle kilometres travelled by 42,008,000 (during the peak hours).

*IMPROVE SAFETY - around intersections; vehicles are no longer parked along interchange ramps.

These figures represent only the savings generated by daytime users of the parking lots during a normal work week. Further savings are generated by the many weekend and evening users of the lots, who carpool perhaps for shopping or recreational purposes.

The 3310 parking spaces provide a safe, convenient and highly visible service to the public.

**ASSUMPTIONS**

Average distance from lot to work: 47.2 km. Taken from TEMP report SAR-81-02, Carpool Parking in the Toronto commutershed (based on a 1979 survey)

Fuel efficiency of vehicles: 12.3 L/100 km based on Stastictics Canada 1986 Fuel Economy Survey.

250 working days per year.
